Experience

Reward Holdings

June 2022 - Present

Front-end Developer

- Proficiently utilized React.js to develop and maintain a code base, translating designs into responsive web interfaces and reusable components.
- Optimized components for top performance across diverse web devices and browsers, efficiently turning designs into functional code while adhering to process specifications.
- Developed a React Native mobile application as an extension of an existing React web app, ensuring a seamless cross-platform user experience and consistent design elements, while also enhancing performance and maintaining a consistent user experience.

Elixir Digital

Feb 2020 - June 2022

Frontend Developer

- Built Native Android apps for corporate use, utilizing both Java and Kotlin to create versatile and high-performance solutions. These apps are optimized for various devices and aligned them with the organization's objectives.
- Utilized React.js to develop dynamic and responsive admin pages for streamlined data management and visualization.
